AP Mana Badi Nadu Nedu Scheme 2019-20CM Jagan Launch of Nadu-Nedu Scheme for SchoolsEnglish Instruction Medium in AP Govt. Schools

Andhra Pradesh govt. has launched AP Mana Badi Nadu Nedu (Our School Now and Then) Scheme on 14 November 2019. On the occasion of children's day celebrations, more than 15,000 schools will get facelift with new Mana Badi Nadu-Nedu scheme. In this scheme, govt. will modernize schools and compare it with

previous ones. The state govt. will spend Rs. 6,000 crore in next 4 years to transform govt. schools across Andhra Pradesh.

CM YS Jaganmohan Reddy has kept a prime focus on the education sector. In this Naadu Nedu Scheme, officials will take photographs of schools and amenities and place it in front of public. The AP govt. will develop schools as per the master plan of government and compare old pics with new ones.

AP Mana Badi Nadu Nedu Scheme should be done in a community contracting manner rather than with private contractors.

(adsbygoogle=window.adsbygoogle||[]).push({});

AP Mana Badi Nadu Nedu Scheme 2019-20

The community contracting system is being implemented for the first time in the country in the form of AP Mana badi Nadu Nedu Scheme. AP govt. schools have lost their shine due to poor amenities where teachers are qualified but lack of facilities has affected student's strength. So, govt. will now modernize govt. schools and ensure good amenities in those schools.

CM Jagan Launch of Nadu-Nedu Scheme for Schools

At the launch event, CM Jagan Mohan Reddy said that "We progressed from land phones to smartphones. We have witnessed drastic changes with the invention of the internet and apps. All this happened within 10 years and in the next 10 years, Artificial Intelligence and Robotics will advance further. A day might come when driverless cars will be on roads." So, AP govt. will develop infrastructure in 15,717 schools out of the 45,000 government schools in the state in the first year.

– YS Jagan Mohan Reddy (@ysjagan) November 14, 2019

AP govt. will work hard under Mana Badi Nadu Nedu Scheme to revive lost glory to govt. schools in rural areas. School buildings, computer labs, separate toilets for girls and boys will be constructed in govt. schools in next 4 years. Mandal education officers at mandal level will monitor the developmental activities.

Several engineers will take up the construction of additional classrooms and restore old buildings with new ones. Furthermore, the parent's committees will play significant role in the scheme and development works will be taken considering their suggestions. All those people who wants to do something in their hometown can share their ideas and advises to community contracting method.

English Instruction Medium in AP Govt. Schools

To improve education standards, AP govt. will introduce English medium of instruction in government schools for class I to VI from the next academic year. Some people are opposing english medium of education in the name of protecting and preserving Telugu culture. But without being taught in English, students will end up in menial and unskilled jobs. They will end up as daily wage earners or car drivers in case they are not in a position to compete in the international job market.

For both teachers and students, changing from telugu to english medium of instruction will be a tedious task. For this purpose, teachers would be given training. The state govt. will introduce bridge courses and setup english labs. In the last financial year, AP govt. had only allocated Rs. 20 crore for 45,000 government schools.

AP govt. will also provide Rs. 15,000 per annum to every parent who admits his children in school. Moreover, AP govt. will also extend Rs. 20,000 per year to every mother who admits her child in degree or engineering courses to meet mess charges and other expenses.

The studies of Subhash Palekar ji and his work on zero budget natural farming are a gift to the nation. We assure him that the Subhash Palekar Natural Farming Program would be fully implemented in the state of Andhra Pradesh. The state is going to become a model for the nation and the entire world.

All the participants needs to arrange their own accommodation in and around Guntur and Vijayawada. Rythu Sadhikara Samstha (RySS) will not be able to provide accommodation to all. For those who are unable to arrange accommodation, RySS will provide a modest accommodation at the venue itself and in that case, participants will have to make their own bedding arrangements.

High Court Stay Order on AP Basavatarakam Mother Kits Scheme

Just within the few hours of its launch, the state govt. has received a shocking news from the Honorable High Court. HC has put a stay order on the launch of this AP Basavatarakam Mother Kits Scheme. This women welfare scheme is facing criticism on its naming after Nandamuri Basavtarakam who was no way associated with the state government.

The primary cause of the stay order is that the state govt. invites “Tenders” by fixing a price tag of each kit at Rs. 1,038. Another company has come forward to provide kits at lower cost than its competitors. However, the company which quoted the higher amount is being given the tender for some undisclosed reasons. AP CM is currently holding the Health Ministry which means that he himself has finalized the prizes. So, the High Court didn’t allow the roll out of Basavtarakam Kits scheme on 15 August 2018.

These meters provides real time information to the Power Utilities and secure the energy usge information.

Smart meters are helpful in providing quick and accurate measurement of power consumption and also capable of receiving commands to work as per our requirement.

These meters can get connected to a web based monitoring system. Accordingly, such meters can minimize utility losses and thus can result in an increase in the revenues.

Tampering of Meters, which is a great issue for the conventional meters, can also be eliminated as Smart Meters possess a Net Metering System.

Govt. can achieve Power Sector Reforms through Smart Meters as these meters enable the companies to know the daily consumption using Time of Day (ToD) method. After gathering information, Power Utilities can cut Rs. 1 per unit between 10 p.m to 2 a.m for indutries while they can impose a penalty of Rs. 1 per unit during peak hours.

```
(adsbygoogle=window.adsbygoogle||[]).push({});
```

Disadvantages of Installing Smart Meters

Along with the above mentioned advantages, Smart Meters also possess certain disadvantages as listed below:-

Smart Meters eliminates the need of Human Meter Readers making it difficult to handle any problem / issues in these meters.

All Smart Meters follow a complex algorithm which is not easy to track and it is also complex to check their performance.

The state govt. wants that the Smart Meters should be supplied as soon as possible to implement this scheme effectively.

(adsbygoogle=window.adsbygoogle||[]).push({});

AP govt. wants to fulfill their following objectives using this scheme:-

Reducing the subsidy burden for agricultural connections – Till date, the state govt. pays subsidy on the purchase of each new agriculture connections. Now this scheme will change the agricultural connections to solar connections will reduce the subsidy burden from the state govt. Cost Effective – Most of the pump sets used in agriculture are electricity based or diesel based (generators). In India, Villages usually suffers from problem of Electricity while the diesel based generators runs on diesel whose prices are increasing. So, this

will be a cost effective method. Daytime Power Supply – For usage of pumps in irrigation, govt. usually provides electricity at night both in winters and summers. In winters, farmers have to work in adverse conditions due to cold weather. So, Solar Pump Sets will enable the farmers to utilize the generated electricity for irrigation even during daytime.

This scheme will divert all the agriculture connections towards the Solar Pump Sets.

(adsbygoogle=window.adsbygoogle||[]).push({});

Implementation of Grid connected Solar BLDC Pump Sets Scheme 2020

All the Superintending Engineers will categorize all new connections coming up in the state to solar. This would be done on completion of existing target of 50,000 agriculture connections per year on subsidy. The total number of existing agriculture connections is around 17.20 lakh for which the state govt. has allocated a subsidy amount of 6,030.17 crore in this year.

Savings Due to Avoided Subsidy with Grid Connected Solar BLDC Pumpset

ParameterValueCapital Cost of 5 HP Grid Connected Solar BLDC PumpsetRs. 4,00,000Net Present Value (NPV) of annual subsidyRs. 4,60,927NPV of Savings to APEPDCL due to avoided subsidy Rs. 60,927Grid Connected Solar BLDC Pumpset Savings due to avoided subsidy

What AP Govt. will Do with Surplus Energy

Due to efficient pumpsets, surplus energy generated from solar panels after consumption by BLDC pumpsets can be injected into grid. This excess energy injected into grid results shall decrease power purchase cost for APEPDCL. AP govt. has announced payment of Rs. 1.50/kWh to the farmers for the excess energy injected into the grid.

Farmer is providing lease free land for installation of Grid connected solar BLDC pumpsets in his field and is maintaining the asset by washing and cleaning solar panels regularly. Hence purchase of excess power from farmers at INR 1.50 per unit of energy injected into grid is a win-win situation for APEPDCL as well as farmers.

Issuance of new Agricultural Connections in AP

Energy Dept. has followed an easy approach for agricultural connections on the basis of targets framed by APERC in their tariff order for FY 2018-19. Now govt's permission will be required for issuing new agricultural connections. Demand for new agricultural connections is rising in Prakasam, Kurnool & Anantpur districts as these areas are facing drought conditions.

Around 1.84 lakh applications for agriculture connections are still pending. Out of this, only 60,000 are paid applications and govt. will soon clear those applications which does not require erection of distribution transformers. Now all the new connections will be placed in the Solar Category and farmers will be encouraged to use solar pump sets. With Solar Pumps, farmers can avail day time power supply with no need to wait for APTransco for new connections.

Adani Group has placed the lowest quote of Rs. 3.35 lakh for 3 HP Pumpset while Junna Powers has quoted lowest bid for 4.29 lakh for 5 HP Pumpset. APEPDCL is making negotiations to lower down the cost further.

The state government of Andhra Pradesh has introduced a new scheme to upgrade the careers of assistant and associate professors in government medical colleges across the state. The assistance and associate professors working in government medical colleges in Andhra Pradesh will be provided higher qualification and upgrade their career.

The main objective of the career advancement scheme is to upgrade the qualification of the faculty and enhance the medical PG seats in the state. THE state government has taken the step to launch the scheme after getting denials several times from the Medical Council of India (MCI) to increase the PG seats in the state.

The MCI has been denying the sanction of more seats to the state because of unavailability of adequately qualified faculty for the postgraduate medical courses. Most of the government medical colleges in the state have shortage of medical professors who are adequately qualified to teach post graduate medical subjects.

(adsbygoogle=window.adsbygoogle || []).push({});

The state medical education department has sent a proposal to the government to promote the assistance professors who have completed at least 5 years in service. The assistance professors would be designated as associate professors while associate professors and professors would also be promoted in similar manner. Having enough faculty for the PG courses and fulfilling The MCI guidelines will enable the state to get more PG seats.

There are only 80 seats in 10 government medical colleges across the state while offering 1550 seats for MBBS. The AP govt. recently sent a proposal to the MCI to increase 40 more seats in the Guntur medical college but MCI denied the proposal because of the lack of adequate faculty.

(adsbygoogle=window.adsbygoogle || []).push({});

The career advancement scheme would help the faculty upgrade their skills and career and get qualified as professors as per the norms of Medical Council of India.

More information about the career advancement scheme can be found on the official website of directorate of medical education of Andhra Pradesh at <http://dme.ap.nic.in>
